The most important of these features are listed below: Structure Mapping Structure Mapping enables you to see how a three-dimensional (3D) model is made up of 2D and 3D elements. You can move a section or a component through different positions in space, including vanishing points, and you can also rotate it in space. To illustrate, let's say you create a 3D model for a wine bottle. In the process, you notice a problem with the bottle that you'd like to fix. You can use Structure Mapping to move the segment with the problem to a new location in 3D space, zoom in and out, and rotate it. After that, you can scale it to its proper size and then embed the changes into the 3D model. By sharing your 3D model with others, you can also help them fix problems in their models without starting from scratch. Energy-Saving Features AutoCAD 2020 introduces new energy-saving features to reduce both processing time and energy usage.
