As he said, "I don't want to do this." But it is a warning also to Congress to act. As he said, "I don't want to do this." Why would it be otherwise? If Congress doesn't act, Trump will, and there's plenty for Congress to act on. The EZ-Pass doesn't go through Stone Mountain. The failed national health care plan is not repealed. As I read the news accounts of what Trump has done in his speech, something jumped out. People say Trump was surprised Congress didn't cooperate when he wanted to change immigration rules. He said: "There's nothing more dangerous than fighting for peace and freedom and then seeing it handed to you on a silver platter." Later in his speech he said of immigration: "The time is overdue to admit the following truth: We should have let you in." The time is overdue to admit the following truth: We should have let you in. - Donald Trump But he doesn't see the border rules he put in place as a violation of his plan. He sees them as the law of the land that is now in conflict with his desire to let in immigrants. That's another opportunity for Congress to act. If it adopts the stronger version of an amendment to immigration bills from years ago, Trump might just be forced to admit, "I did have that law and I should have followed it." Any hope that Trump might reduce the number of immigrants admitted to the United States is toast. The Department of Homeland Security has no power over that and it's pretty clear Trump has no idea how to change it. He can't say, "Don't let the bad apples in." He's already been that guy. The times are overdue to admit the following truth: We should have let you in.

=========================== RPG Maker MV is the most advanced "RPG Maker series", which has been released since the first version of "RPG Maker series". "Time Fantasy: Japan" is the first RPG Maker MV project.In the battle, you can view the characters skills and use their special attack by using the usable gauges in the characters power bar. The characters skills are divided into two categories: 1. Skills which are used when a character is moving. The special attack is summoned when the person attacks a enemy and uses up the gauge of the character's special attack. 2. Skills which is used when a character is standing still. These skills can be used when the character is in the air and approaching an enemy, so the enemies can attack you even when you're in mid air. These skills require a lot of points for usage. You can increase the number of gauge-ups for the special attack, attack power, and all kinds of health. The numbers of gauge-ups depend on the character's skills and attack power. There are four characters in each faction to chose from. In addition, there are 21 types of enemies with three more types each day, whose attacks and skills are all unique. You can see three types of attacks, including a fire attack, a hit attack, and a special attack. When you defeat an enemy, you get points as rewards! There are also special items which can be taken away, such as a luck point and a health point. All of this is made possible through the RPG Maker MV, the most advance "RPG Maker series". If you have trouble with the game, please contact us. Q: How to "merge" some columns under one row? I have a table named books and records in books is the number of copies. However, the records I received is very different, the data of each book is very different, each book has the information for 1-100 copies. How to make it as 1 row as the data of 100 copies? For example, if in each row, there is only a number of copies, the row just shows '1', if the row of the same book has 2,3,9,10,90 copies, then just show 1-100 but not each 100 copies for each book. I use mysql Thank you very much A: LEAD/LAG SELECT tbl.*, @len := @len + len FROM TABLE tbl CROSS JOIN (SELECT @len := 0) const ORDER BY ord; FULL OUTER JOIN SELECT tbl.* FROM table tbl LEFT JOIN table tbl2 ON tbl1.ord = tbl2.ord + 1 CROSS JOIN table tbl3 ON tbl2.ord = tbl3.ord JOIN TABLE tbl4 ON tbl3.ord = tbl4.ord + 1 WHERE tbl3.ord IS NULL ORDER BY ord; RIGHT OUTER JOIN SELECT tbl.* FROM table tbl RIGHT JOIN table tbl2 ON tbl1.ord = tbl2.ord + 1
